Re: DA 12-1863, IB Docket No. 12-340; RM-11683

Dear Commissioner GENACHOWSKI:

Please accept the following comments in regards to LightSquared's license Modification Application and petition for Rulemaking. My county, Miami County, Ohio, does not have many options for mobile broadband access. I believe LightSquared could change that, so I want to strongly urge you to grant the company's request to modify its license.

While many would believe that a county of over 100,000 people located along a major interstate system, I-75, in Ohio would have readily available access to broadband, this unfortunately is not the case. I realize the deployment of broadband must be done in a way that balances both long term benefit and potential impacts it can have on existing industries.

I have followed LightSquared's plan to come up with a plan to deploy a proposed national broadband network and it is my understanding that LightSquared has amended their plan that was alleged to have caused GPS Interference, and it is also my understanding this means GPS receivers Will have what amounts to a 10 MHz buffer at LightSquared's expense. This alternative would seem to make this whole idea of sharing go a long Way to make efficient use of our very limited spectrum resource. This Would mean communities, like mine, will get quicker access to a more competitive nationwide mobile broadband network.

I ask the FCC to move forward quickly so the residents of my county will receive the long overdue opportunity to have access to reliable broadband.

I am grateful for you time and appreciate your consideration.

Respectfully,

Stanley A. Evans
